

Austrian Pine and Red Pine Program

Many Pine tree varieties have had an increase in insect and disease problems. The Austrian, Scotch and Norway (red) Pines are especially susceptible. When these problems are detected, we recommend the following:

DIPLODIA TIP BLIGHT – An injection or a series of sprays.

PINE SHOOT MOTH – A series of sprays.

PINE BARK BEETLE or BORER – An injection and/or series of sprays.

PINE COLLAR WEEVIL – Clean the root collar and spray.
